## How to review potential matches on Housemate Finder

To find other Housemate Finder members and search for a potential match, follow the 'Housemate Search' from the drop down menu under your profile name in the top navigation bar of your profile.

This screen gives you the option to look at all members and get basic profile information for those you are not friends with as well as see your friends list. There is also an option to find the suggested matches that they system automatically creates based on your profile information compared to other members. You can sort the information on this page by Last Active, Newest Registered and Alphabetical.

From the screen of other members, you will see some very basic info about the other members if they have completed their profile information. If they have not completed information in their profile this space will be blank. You can learn more about someone by asking them to be your friend.

In addition to the system recommended matches, on the right side of the screen there are options to fill in that will narrow down potential matches within the member profiles. Fill in one or all of the filters to find potential matches.

After you send a friend request, the screen will change to show different options for that person.
