How to Accept a Friend Request

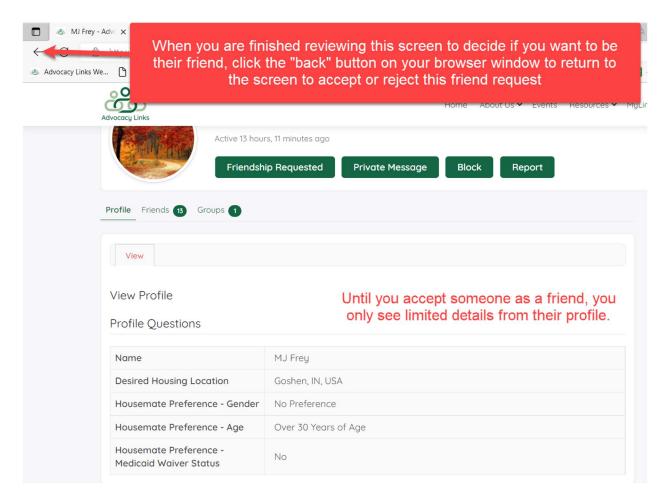

You will receive an email and the notifications button at the top of the screen will indicate that someone has requested to be a friend. Go to the "Friends" tab and choose "requests"

It is possible to accept or reject requests directly from this screen, but it's better to click on the person's profile

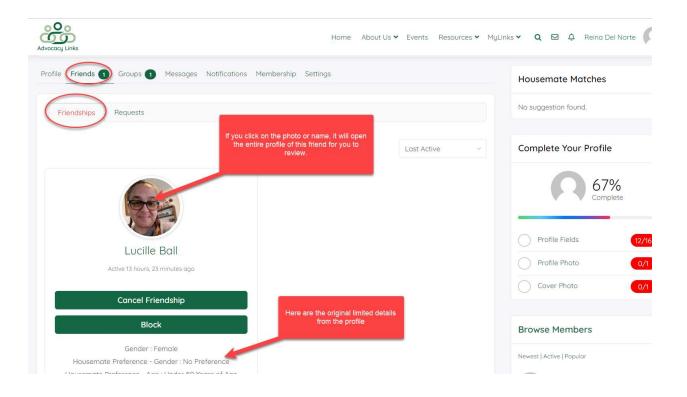

You have the ability to view minimal details about the person to help you decide if you want to be their friend.

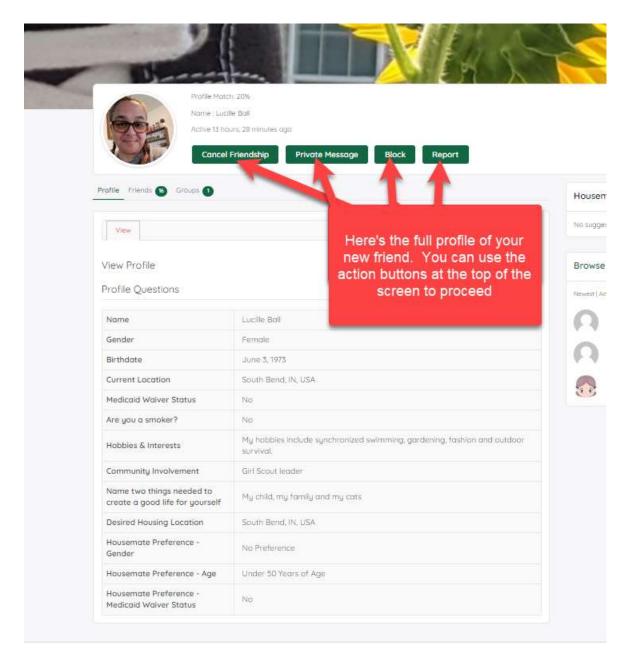

You will need to hit the "back" button on your browser window to get back to the screen to accept/reject the friend request.

You will find all your friends on your "Friends" tab, under "friendships." Initially, you will only see the minimal details you already know about friends, but if you click their name or photo, it will open up their full profile for you to learn more.

The action buttons at the top of the screen allow you to take next steps with this friendship.

- Cancel Friendship If you'd rather not be this person's friend after reviewing their full profile (see additional instructions)
- Private Message if you'd like to contact this person to learn more, schedule an offline conversation, set up a meeting, plan a visit, etc.
- Block If you've been harassed by someone and don't want any further interaction (see additional instructions)
- Report If you've seen or experienced something mildly offensive (inappropriate photo, language, written information, etc..) please report the issue privately to our administrative support so we can address it. (See additional instructions)
